

Iverson Road

West Hampstead, London

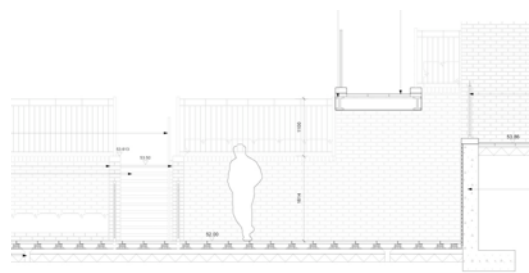

We were appointed by our client to develop a planning approved scheme and to provide them with information to discharge all landscape related conditions for this residential development. In addition our remit was to provide a full tender pack of information to enable the tender of the soft landscape element of work. Finally we are responsible for monitoring the on site external works as it progresses on site.

Our proposals needed to accommodate the level change along the Iverson Road frontage, provide screening to the adjacent Network Rail land to the north of the site and create a meaningful courtyard space at the heart of this development. Where possible private patios were provided to all ground floor units. Disabled access was required to all ground floor units.

We were responsible for providing detailed information to discharge the two conditions which related to a green wall at the west elevation of the building and a biodiverse roof on top of the west block.

This project is due for completion in early 2015.
