## **Practice Overview**

Davis Landscape Architecture was established in 2009 by Justin Davis (CMLI). The practice has been steadily growing since then and we are now currently employ a team of 5 qualified landscape architects. With each new project our objective is to provide our client with a design solution and service that adds value and exceeds their expectation.

Our work profile by sector is currently:

- 75% Residential & mixed use
- 10% Offices/ business park
- 5% School
- 10% Other

Our work profile by RIBA stages is currently:

50% To Planning (0 -3)

Davis Landscape Architecture Limited

VAT Registration Number 979558439

Registered in England and Wales Company Number 07018870

50% Tender/ Construction (4 -6)

The standard services we offer are RIBA Stages 0 to 6. Our output typically includes:

- Sketch designs to enable the discussion and costing of landscape options.
- Drawn information and Landscape Design Statements to support detail/ outline planning applications.
- Drawn and written information to satisfy planning conditions.
- Coordinated landscape architect's tender and construction information, including NBS specification.
- Maintenance & management plans.
- Landscape & Visual Impact Assessment (LVIA) reports.

We are very experience in podium deck landscape design with approximately 40% of our projects located on structural slabs. We often lead the external works coordination process, ensuring our landscape package of information and other consultants information is fully coordinated. We take responsibility for the setting out of all landscape elements including street furniture and lighting. We ensure we take sufficient time to ensure other consultants information aligns fully with our proposals.

We are experienced in the design of children's play spaces, usually associated with new residential developments. We are able to produce child yield calculations based on the GLA's SPG 2012 Shaping Neighbourhoods Play & Informal Recreation and the GLA's 2019 Population Yield Calculator.

Our horticultural and plant knowledge is excellent and we pride ourselves on the production of attractive, robust planting schemes. This is complimented by our sound understanding of hard landscape detailing. As a practice we ensure we have up to date knowledge of construction materials and techniques relevant to our discipline. We are familiar with the Urban Greening Factor Calculator.
